Guardian Ad (Brawn).pdf 1/10/04 9:27:03 AM

Because Every Operation Needs an Enforcer. The ADAPCO name you trust introduces the Guardian line of ULV sprayers to attack the demanding needs of your mosquito control spray operation. The technologically-robust Guardian 190 SS and the perfectly-economical 190 ES models both deliver the industry's most powerful engine and increased fuel capacity to meet your professional application needs. For more bite-sized swarms, the Guardian 95 ES model empowers you with the same professionalism, reliability and affordability in a compact design. And since Guardian is innovatively-designed by ADAPCO engineers, all models offer plug-and-play functionality with Monitor 4 for maximum quality and effectiveness. *Contact us to learn how Guardian can enforce responsibility and accountability for your mosquito control operation.*

Monitor 4

Because Every Operation Needs a Mastermind.

The Monitor name you trust is now more effective than ever in managing your mosquito control spray operation. The new Monitor 4 from ADAPCO ensures a more consistent and economical EPA-conforming ULV pesticide application. And password protection guarantees security as your drivers capture trip data. GeoTracker GIS software stores all vehicle location and application data from multiple trips, converting it to industry-standard formats for display and reporting. With the power of Monitor 4 in your drivers' hands, you'll feel better about putting them in the driver's seat. Monitor 4 with GeoTracker delivers unparalleled variable flow control technology — so you can maximize control over mosquitoes and your chemical dollars. *Contact us to learn how Monitor 4 can mastermind responsibility and accountability for your mosquito control operation.*

GPS Technology

- Accuflow
- Monitor 4
- Monitor 4 RG (Geoflow)

Accuflow

Accuflow

- GPS variable flow
- In-cab controls
- No recording capability
- Designed to give you accurate pesticide application at varying speeds

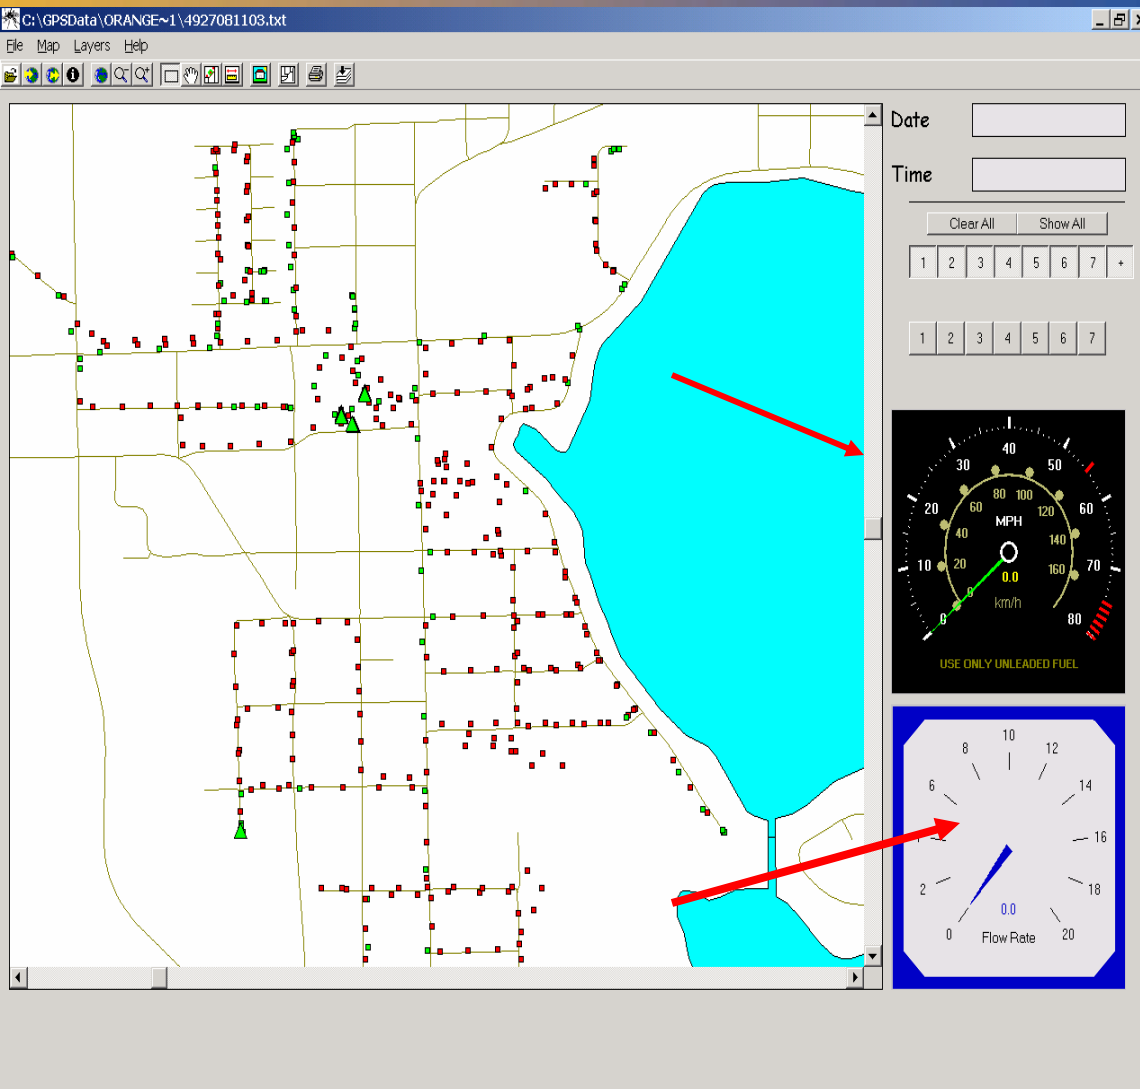

Monitor 4

Monitor 4

- Variable flow
- In-cab controls
- Provides a hard-copy report of pesticide applications
- Mapping
- Gives the applicator variable flow and provides a report with location, amount of pesticide applied, acres treated, etc., and treatment map

Post event vehicle activity tracking

- Area & driver ID
- Latitude & Longitude
- Date & time stamps
- Mission start / end times
- Chemical & oz. applied
- Total miles vs. spray miles
- Total time vs. spray time
- Acres treated
- Average spray speed
- Speed & heading
- Flow rate & status

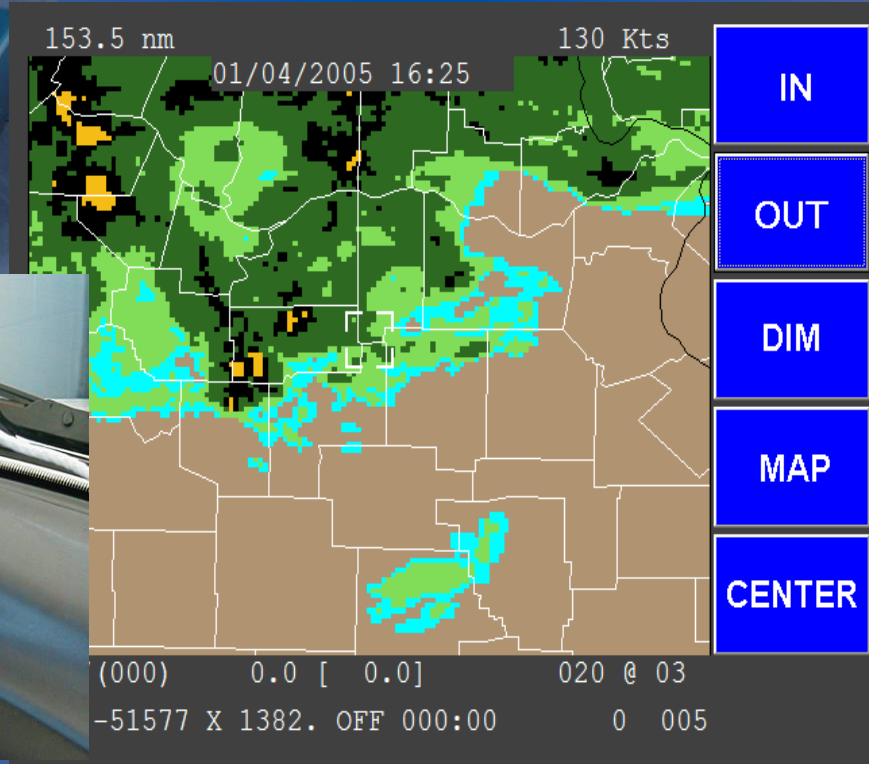

Monitor 4

Routing & Guidance

- Variable flow
- Programmed spray route
- In-cab controls and touch screen
- In-cab map and directional bar
- Mapping and reporting features
- Mission data
- Capable of wireless file transfers
- Designed for agencies that hire seasonal employees or want greater control of ULV treatments

Additional Features

New Mountain Innovations

Weather Station
